

End-to-End Revenue Management
for Cities and Municipalities

Powered by Phoenix Technologies

Our goal is to transform our clients into ‘model communities’ that are:

- **Financially secure**
- **Able to provide quality, cost-effective services**
- **Positioned for economic, educational and cultural prosperity**

Improve revenue and service without raising taxes	Better Decision-making	Better customer service	Cost-effective solution with minimal capital outlay
How?	Benefits		
Reduce revenue leakage	✓ Dedicate more resources to programs and services available to citizens		
Automate and streamline operations	✓ Improve compliance and collection efficiency		
Robust, configurable out-of-box functionality	✓ Rapid deployment of legislative and policy changes ✓ Better service delivery and customer service satisfaction ✓ Efficient accounting and financial reporting		
Simplify solution maintenance	✓ Enable cost-effective, self-sufficient maintenance ✓ Minimize risk of unsupported crippling technical malfunctions ✓ Reduce risk of budget shortfalls with predictable maintenance costs		

Bottom Line

Reverse current trends by increasing revenues and lowering expenditures to focus more resources on citizen services and growth.
